Experience

projekt202 | Addison, Texas | Mar. 2018 - Present

Director of Technology

- Lead development efforts on over $5MM of development work, delivering successful, on time outcomes for multiple clients
- Developed standardized role definitions and a performance evaluation tool to align internal stakeholders to well-defined career paths
- Created new tool for estimating work to ensure accurate planning and messaging during the sales and delivery processes
- Coordinated staffing of developers and architects across all projects and clients, with a focus on proactively combating "burn out"

Capital One | Plano, Texas | Feb. 2017- Mar. 2018

Manager, Design Technology

- Spearheaded information architecture and UI component library creation for the expansion of dealer platform handling over $500MM in loan originations
- Trained team of backend developers in modern front-end practices with Angular 4, Redux and Sass during full re-architecture of foundational sales tool
- Constructed high-fidelity prototypes of new dealer tools to validate functionality enhancements with actual users, reducing cost and time to market for new features
- Championed Agile methodologies to foster collaboration and transparency between design, development and product teams

projekt202 | Addison, Texas | Sep. 2015- Feb. 2017

Managing Architect

- Architected design system for multi-billion dollar enterprise client, providing a roadmap for user interface unification across a diverse product suite
- Collaborated with business development team to build new client relationships and estimate scopes of work, helping to successfully secure many new projects
- Evaluated potential team members' cultural fit, technical proficiency and consulting skills to grow development team
- Effectively managed team of developers across multiple projects, with a focus on growth of consulting and technical skills
